471 application # 161062149
Billed Entity #138981

To whom it may concern:

I have filed the Erate forms for several years. The website has changed and was very hard to follow. After completing my form 470 and waiting the 29 days for bids, I filed a 471. In July I went into the USAC website to file the necessary 486. The 471 to link it to had been deleted from the system. I called the helpline and they told me our Internet consult had deleted it accidentally by changing our entity from a school to a district. I have tried numerous times to get this fixed by creating a new 486 out of the open window. I have waited for approval and never gotten anything. I called today and was told I would need to file an appeal. Can you help me get my 471 approved so that my school doesn't miss out on funding for your basic phone services to contact parents etc with. Thank you!

Sincerely,

Book Keeper
